Memorial Hospital

Announcements

A majority of your health information is available via your MHCS Health Portal. This means that you may see your test results before your provider has had a chance to review them. Test results can be complex and difficult to understand. If you see something that concerns you or that you don't understand, we encourage you to discuss your results with your provider at your next scheduled appointment. This will give your provider the time they need to fully interpret the results and prepare for your visit.

It is very important to us at MHCS that you are able to access your health information. If there is something you expected to find in your health portal which is not currently available to you, please contact us at Memorial Hospital by calling 402-646-4633 or by email at: hospitalsupport@mhcs.us so that we may assist with your request.

As a MHCS patient, you may choose to grant proxy access to any designated adult, such as a spouse or medical decision caregiver, to your health portal account. Portal proxy access is intended to assist and support a patient in managing their medical care. Granting such access allows the proxy to use the patient portal to view and manage your information as if logged in as you. This may include access to information that is personal or sensitive; such as test results, treatments and medical opinions related to substance abuse, mental health, sexually transmitted diseases, and pregnancy.

Subject: Seward Hospital New Activity

Dear Perseus,

New information is available on your Seward Hospital Health Portal. Please click the link to sign into your portal and view the new information.

You have new items. Click on the link(s) below to view.

- [Medical Record Download](#)

You can log on to the Home page of your portal by accessing the link below:

[Click here to sign in.](#)

• Download Medical Record (Updated)

To download your medical record file follow these steps:

1. Select the Compile button to start gathering your medical information in Zip file format.
2. Select the Download button to save the zipped file to your selected location. Depending on your settings the file may save automatically to a default location.
3. Once the download is complete, unzip/extract the downloaded zipped file. On most devices, you can do this by either double-clicking or right-clicking the file.
4. After the file is unzipped, open the Readme file in the unzipped folder for further instructions. The unzipped folder will contain two types of files: those that you can read directly, and other types that can only be read by computers and are used when importing this information into other computer systems.

Caution: Anyone with access to your device could potentially see the downloaded files that contain your personal information.
