## Memorial Hospital

### Announcements

A majority of your health information is available via your MHCS Health Portal. This means that you may see your test results before your provider has had a chance to review them. Test results can be complex and difficult to understand. If you see something that concerns you or that you don't understand, we encourage you to discuss your results with your provider at your next scheduled appointment. This will give your provider the time they need to fully interpret the results and prepare for your visit.

It is very important to us at MHCS that you are able to access your health information. If there is something you expected to find in your health portal which is not currently available to you, please contact us at Memorial Hospital by calling 402-646-4633 or by email at: hospitalsupport@mhcs.us so that we may assist with your request.

As a MHCS patient, you may choose to grant proxy access to any designated adult, such as a spouse or medical decision caregiver, to your health portal account. Portal proxy access is intended to assist and support a patient in managing their medical care. Granting such access allows the proxy to use the patient portal to view and manage your information as if logged in as you. This may include access to information that is personal or sensitive; such as test results, treatments and medical opinions related to substance abuse, mental health, sexually transmitted diseases, and pregnancy.

# Changes to Locations of Features

---

## Most Impacted Redesign Feature

- **Health Record:** Now only contains individual widgets for Allergies, Conditions, Immunizations, Medical History, Surgical History, Family History, and Download Medical History.
- Each Health Record sections has a “Print Icon” that allows users to print an overview of that section.

### Changes of Locations of Features:

- **Results & Reports:** Have been combined into 1 tab.
- **Visit History:** Has been renamed to “Past History”
- **Scanned Documents:** Has been renamed to “Documents”. The Continuity of Care (CCD) has been updated to be included in the Documents feature.
- **Profile, Shared Access, Preferences, & Log out:** Now all exist under “Account Options”

**Download Medical Record**

No medical record file available to download.

A request for this patient's medical record file is being processed. You will receive an email notification once the file becomes available. You will have a time limit to download this file to your device.

Last requested date and time: January 8, 2026 10:00 AM  
Last requested by: Heather A Test  
File status: Pending
