

3rd Dose or Booster: Which is right for me?

Which vaccine have you received?

Johnson & Johnson

Pfizer

Moderna

Unfortunately the Johnson & Johnson vaccine has not been approved for additional doses at this time. Keep an eye out for more information as it becomes available.

Are you immunocompromised?
 Current CDC guidelines include the following people as immunocompromised:
 • Been receiving active cancer treatment for tumors or cancers of the blood
 • Received an organ transplant and are taking medicine to suppress the immune system
 • Received a stem cell transplant within the last 2 years or are taking medicine to suppress the immune system
 • Moderate or severe primary immunodeficiency (such as DiGeorge syndrome, Wiskott-Aldrich syndrome)
 • Advanced or untreated HIV infection
 • Active treatment with high-dose corticosteroids or other drugs that may suppress your immune response
 NOTE: People should talk to their healthcare provider about their medical condition, and whether getting an additional dose is appropriate for them

You may receive a 3rd dose of the COVID-19 vaccine.

 • [Click here](#) for more information about underlying medical conditions.
 • [Click here](#) for general information about booster doses.
 • For questions or comments, please contact Four Corners Health Department at 402-362-2621

Did you receive the Pfizer vaccine?

Has it been at least 6 months since your last dose?

Are you over 65?

You may receive a booster dose of the Pfizer vaccine.

Unfortunately only the Pfizer vaccine is approved for booster doses. Please keep an eye out for more information as it becomes available.

Current recommendations are that you must wait at least 6 months until receiving a booster dose.

Are you 18-64 & in a "high risk" group?
 High risk groups include:
 • those with underlying medical conditions
 • people at increased risk for COVID-19 exposure and transmission because of occupational or institutional setting

You are not recommended for a booster dose at this time.
